Now with optional alarms⁺ for adults and children with diabetes (ages 4 and older)

FreeStyle Libre 2

The FreeStyle Libre 2 System is Here

THE ONLY ICGM WITH OPTIONAL ALARMS[†] THAT MEASURES GLUCOSE ACCURATELY EVERY MINUTE^{1,2}

- Unsurpassed 14 day accuracy¹ for adults and children with diabetes (ages 4 and older)
- Optional, real-time alarms⁺ with readings every minute
- More affordable CGM[§] at one-third the cost of other CGMs[∥]

Abbott

*Fingersticks are required if your glucose alarms and readings do not match symptoms or when you see Check Blood Glucose symbol during the first 12 hours.

*Notifications will only be received when alarms are turned on and the sensor is within 20 feet of the reading device. *Based on a comparison to Dexcom G6. §Based on a comparison of list prices of the FreeStyle Libre 2 system vs competitors' CGM systems. The actual cost to patients may or may not be lower than other CGM systems, depending on the amount covered by insurance, if any. Il Based on a comparison of list prices of the FreeStyle Libre 2 system versus competitors CGM systems, assuming annual use of one receiver (or equivalent hardware) and quantity of transmitters and/or sensors according use life.

*Notifications will only be received when alarms are turned on and the sensor is within 20 feet of the reading device.

† Data based on the number of sensors fulfilled in US Retail Pharmacy for FreeStyle Libre family of personal CGMs compared to the number of sensors for other personal CGM brands. Indications and Important Safety Information

The FreeStyle Libre 2 Flash Glucose Monitoring System is a continuous glucose monitoring (CGM) device with real time alarms capability indicated for the management of diabetes in persons age 4 and older.**

WARNINGS/LIMITATIONS**: The System must not be used with automated insulin dosing (AID) systems, including closed loop and insulin suspend systems. Remove the sensor before MRI, CT scan, X-ray, or diathermy treatment. Do not take high doses of vitamin C (more than 500 mg per day), as this may falsely raise your Sensor readings. Failure to use the System according to the instructions for use may result in missing a severe low blood glucose or high blood glucose event and/or making a treatment decision that may result in injury. If glucose alarms and readings from the System do not match symptoms or expectations, use a fingerstick blood glucose value to make diabetes treatment decisions. Seek medical attention when appropriate and contact Abbott toll-free 855-632-8658 or visit ** www.FreeStyleLibre.us for detailed indications for use and safety information.

** Please refer to www.FreeStyleLibre.us for the indications and important safety information.

Indications and Important Safety Information

FreeStyle Libre 2 System: The FreeStyle Libre 2 Flash Glucose Monitoring System is a continuous glucose monitoring (CGM) device with real time alarms capability indicated for the management of diabetes in persons age 4 and older.** WARNINGS/LIMITATIONS**: The System must not be used with automated insulin dosing (AID) systems, including closed loop and insulin suspend systems. Remove the sensor before MRI, CT scan, X-ray, or diathermy treatment. Do not take high doses of vitamin C (more than 500 mg per day), as this may falsely raise your Sensor readings. Failure to use the System according to the instructions for use may result in missing a severe low blood glucose or high blood glucose event and/or making a treatment decision that may result in injury. If glucose alarms and readings from the System do not match symptoms or expectations, use a fingerstick blood glucose value to make diabetes treatment decisions. Seek medical attention when appropriate and contact Abbott toll-free 855-632-8658 or visit ** www.FreeStyleLibre.us for detailed indications for use and safety information. **Please refer to www.FreeStyleLibre.us for the indications and important safety information.

Freetyle Libre 14 day System: FreeStyle Libre 14 day Flash Glucose Monitoring system is a continuous glucose monitoring (CGM) devices indicated for replacing blood glucose testing and detecting trends and tracking patterns aiding in the detection of episodes of hyperglycemia and hypoglycemia, facilitating both acute and long-term therapy adjustments in persons (age 18 and older) with diabetes. The system is intended for single patient use and require a prescription. **CONTRAINDICATIONS:** Remove the sensor before MRI, CT scan, X-ray, or diathermy treatment. **WARNINGS/LIMITATIONS:** Do not ignore symptoms that may be due to low or high blood glucose, hypoglycemic unawareness, or dehydration. Check sensor glucose readings with a blood glucose meter when Check Blood Glucose symbol appears, when symptoms do not match system readings, or when readings are suspected to be inaccurate. The system does not have alarms unless the sensor is scanned, and the systems contain small parts that may be dangerous if swallowed. The system is not approved for pregnant women, persons on dialysis, or critically-ill population. Sensor placement is not approved for sites other than the back of the arm and standard precautions for transmission of blood borne pathogens should be taken. The built-in blood glucose meter is not for use on dehydrated, hypotensive, in shock, hyperglycemic-hyperosmolar state, with or without ketosis, neonates, critically-ill patients, or for diagnosis or screening of diabetes. When using FreeStyle LibreLink app, access to a blood glucose monitoring system is required as the app does not provide one. Review all product information before use or contact Abbott toll-free 855-632-8658 or visit www.FreeStyleLibre.us for detailed indications for use and safety information.
